BAM INVESTMENTS CORP.

2011 SECOND QUARTER
INTERIM REPORT TO SHAREHOLDERS
FOR THE PERIOD ENDED JUNE 30, 2011

To The Shareholders:

BAM Investments Corp. recorded a comprehensive income, which consists of net income and other comprehensive income, of $36.4 million for the three months ended June 30, 2011, primarily the result of an increase in the market value of its investment portfolio. This contributed to an increase in the company's net book value of $0.49 per share during the three months ended June 30, 2011 to $17.27 per share. Comprehensive loss in the same period in the prior year was $79.6 million. The company recorded net income of $1.5 million ($0.02 per common share) for the three months ended June 30, 2011 compared to $5.3 million ($0.07 per common share) for the same period in the prior year.

During the three months ended June 30, 2011, the company repurchased 5.0 million of its common shares under a substantial issuer bid at a purchase price of $16.75 per common share for total consideration, including transaction costs, of $84.0 million.

Outlook and Net Asset Value

BAM Investments Corp. owns 56.2 million Class A Limited Voting Shares ("Class A Shares") of Brookfield Asset Management Inc. ("Brookfield") with a market value at June 30, 2011 of $1,796.4 million based on quoted market values. The company's capitalization consists primarily of $492.4 million of retractable preferred shares and common equity with a book value of $1,281.9 million as at June 30, 2011.

The company's objective is to provide its common shareholders with capital appreciation as opposed to income returns. Operating cash flows are dedicated principally to paying dividends on its preferred share financing obligations. The company holds approximately 7.6 Brookfield Class A Shares for every 10 common shares of BAM Investments.

On behalf of the Board,

Edward C. Kress

Management's Discussion and Analysis

Overview

BAM Investments Corp., (the "company") is a leveraged investment company whose principal investment is a direct and indirect ownership interest in 56.2 million Class A Limited Voting Shares ("Class A Shares") of Brookfield Asset Management Inc. ("Brookfield").

The company's objective is to provide its common shareholders with capital appreciation as opposed to income returns. Investment income, which consists principally of dividends from its investment in Brookfield Class A Shares, is dedicated to paying dividends on its financing obligations.

The company's investment in Brookfield is owned directly and indirectly through BAM Split Corp. ("BAM Split"), a public subsidiary in which BAM Investments owns 100% of the common equity. BAM Split has publicly listed retractable preferred shares of which $492.4 million were outstanding at June 30, 2011.

Additional information on the company and BAM Split, including the company's annual information form, is available on SEDAR's web site at www.sedar.com.

Results of Operations

Overview

BAM Investments Corp. recorded a comprehensive income, which consists of net income and other comprehensive income, of $36.4 million for the three months ended June 30, 2011, primarily the result of an increase in the market value of its investment portfolio. This contributed to an increase in the company's net book value of $0.49 per share during the three months ended June 30, 2011 to $17.27 per share. Comprehensive loss in the same period in the prior year was $79.6 million. The company recorded net income of $1.5 million ($0.02 per common share) for the three months ended June 30, 2011 compared to $5.3 million ($0.07 per common share) for the same period in the prior year.

Investment Income

Investment income for the three and six months ended June 30, 2011 consists of the following:

	Three months ended June 30		Six months ended June 30	
thousands	**2011**	2010	**2011**	2010
Dividends:				
Brookfield	**$ 6,938**	$ 7,307	**$ 14,092**	$ 14,988

	$ 8,606	$ 9,079	**$ 17,163**	$ 18,474

The company received dividend income of $6.9 million (2010 – $7.3 million) from its investment in Brookfield. Brookfield declares dividends in U.S. dollars, and as a result the Canadian dollar equivalent recorded by the company decreased due to a weaker U.S. dollar relative to the Canadian dollar compared to the prior year. This was partially offset by the higher number of shares held during the period following the acquisition of an additional 760,000 shares in the first quarter of 2011.

During the period the company sold its portfolio of U.S. high yield corporate bonds and recognized a gain of $1.8 million. The proceeds were invested in units of Brookfield New Horizons Income Fund (“New Horizons”), a newly formed income trust, which owns an economic interest in a similar portfolio of high yield bonds. The company uses the equity method of accounting for New Horizons and its proportionate share of New Horizons loss was $1.1 million during the period. This loss consisted of a $1.2 million realized gain and $2.3 million of unrealized losses on performance of the fund.

Expenses

The company paid $6.5 million (2010 – $5.0 million) of dividends on the retractable preferred shares during the three months ended June 30, 2011. The increase in preferred dividends is the result of dividends paid on the $125 million Class AA, Series V Preferred Shares, which were issued on December 10, 2010.

The amortization of deferred financing costs associated with preferred shares issued by BAM Split resulted in a charge against income of $0.6 million (2010 – $0.5 million). The increase in deferred financing fees is a result of the amortization of fees incurred on the Class AA, Series V Preferred Shares, which were issued in December 2010, as noted above.

Foreign Currency Revaluation

The company recorded a $0.1 million loss due to foreign currency revaluation (2010 – gain of $2.7 million) on its high yield corporate bond portfolio and its U.S. dollar cash balances. The U.S. dollar bonds were sold during the period and as such its exposure to U.S. currency revaluation has reduced.

Income Taxes

The company recorded a net income tax recovery of $0.3 million (2010 – expense of $0.9 million) during the period ended June 30, 2011 as a result of a decreased amount of taxable income.

Financial Position

The company’s total assets decreased to $1,935.5 million at June 30, 2011 from $2,076.3 million at December 31, 2010. The decrease in total assets is primarily a result of a decrease in the fair value of the Brookfield Class A Shares, the price of which decreased from $33.15 per share at December 31, 2010 to $31.95 at June 30, 2011.

Investment Portfolio

Investment in Brookfield Asset Management Inc.

In February 2011, the company acquired an additional 760,000 Brookfield Shares for $25.0 million, increasing its investment to 56.2 million (December 31, 2010 – 55.5 million) Class A Shares, representing a 9.0% (December 31, 2010 – 9.6%) fully diluted equity interest. The quoted market value, based on the bid price of this investment as at June 30, 2011 of $31.95 per share, was $1,796.4 million.

The company has classified the Brookfield shares as available-for-sale financial instruments, and accordingly recognizes changes in the market value of these shares through Other Comprehensive Income.

Brookfield is a global asset manager focused on property, power and other infrastructure assets with approximately $150 billion of assets under management and is inter-listed on the New York, Toronto and NYSE Euronext stock exchanges. Further information on Brookfield can be found on Brookfield's web site at www.brookfield.com.

Other Securities

The company holds an investment in Brookfield Infrastructure Partners which consists of 2.2 million (December 31, 2010 – 2.2 million) Limited Partnership Units with a quoted market value at $53.4 million as at June 30, 2011. This investment is classified as an available-for-sale financial instrument and accordingly changes in the market value are recorded in Other Comprehensive Income.

The company disposed of its portfolio of U.S. high yield corporate bonds to acquire 6.1 million units of New Horizons. The market value of New Horizons was $59.9 million as at June 30, 2011. The company exercises significant influence over New Horizons as its ownership interest is 47%. As a result, the company accounts for New Horizons using the equity method, and as such records its proportionate share of the investee's income as equity accounted income in the consolidated statement of operations.

Deferred Taxes

The deferred tax liability represents the potential tax liability based on the excess of the carrying value of net assets over the respective tax values, less available loss carry forwards. The liability decreased during the period primarily due to the decrease in the market value of the Brookfield Class A Shares.

Liquidity and Capital Resources

The company holds cash and equivalents totalling $24 million and marketable securities of $113 million as at June 30, 2011. The company does not have any maturing debt or mandatory preferred share redemptions prior to July 2014. The operating cash requirements for 2011 include $26 million of scheduled dividend payments on the $492 million preferred shares issued by BAM Split which are less than the expected regular distributions on the Brookfield securities held by the company. Accordingly, the company believes it has sufficient liquid assets, operating cash flow and financing alternatives to meet its obligations.

On June 13, 2011, the company completed its offer to acquire 5 million of its common shares at a price per share of $16.75 for total consideration, including transaction costs, of $84.0 million.

Retractable Preferred Shares

Retractable preferred shares issued by BAM Split are comprised of the following:

Thousands, except shares outstanding		Latest Redemption Date	**Jun. 30, 2011**	Dec. 31, 2010	Jan. 1, 2010

1 *Deferred financing costs are amortized over the term of the borrowing following the effective interest method.*

On December 10, 2010, BAM Split issued $125 million Class AA Preferred Shares, Series V.

Shareholders' equity

As at June 30, 2011 shareholders' equity consisted of 74,206,510 common shares and had a book value of $1,281.9 million compared to $1,408.3 million at the end of 2010. The decrease is the result of a lower market value of the Class A Shares of Brookfield, whose share price decreased from $33.15 at December 31, 2010 to $31.95 at June 30, 2011. The company repurchased 5,000,100 of its common shares during the period ended June 30, 2011.

Business Environment and Risks

The company's activities expose it to a variety of financial risks, including market risk (i.e. currency risk, interest rate risk, and other price risk), credit risk and liquidity risk. The following are risk factors relating to an investment in the common shares of the company.

Fluctuations in Value of Investments

The value of common shares may vary according to the value of the Class A Shares and other securities owned by the company. The value of these investments may be influenced by factors not within the control of the company, including the financial performance of Brookfield and other investees, interest rates and other financial market conditions. As a result, the net asset value of the company may vary from time to time.

The future value of the common shares will be largely dependent on the value of the Class A Shares. A material adverse change in the business, financial conditions or results of operations of Brookfield and other investees of the company will have a material adverse effect on the common shares of the company. In addition, the company may incur additional financial leverage in order to acquire, directly or indirectly, additional securities issued by Brookfield, which would increase both the financial leverage of the company and the dependency of the future value of the common shares on the value of the Class A Shares.

Foreign Currency Exposure

Brookfield and other investments held by the company are functionally United States dollar investments. Accordingly, the value of the these assets may vary from time to time with fluctuations in the exchange rate between Canadian and United States dollars. Also, Brookfield and other investments held by the company pay distributions and interest in United States dollars. Strengthening of the Canadian dollar relative to the United States dollar could decrease the amount of cash available to the company.

Leverage

The company's assets are financed in part with the retractable preferred shares issued by BAM Split. This results in financial leverage that will increase the sensitivity of the value of the common shares to changes in the values of the assets owned by the company. A decrease in the value of the company's investments may have a material adverse effect on the company's business and financial conditions.

Liquidity

The company's liquidity requirements are typically limited to funding interest and dividend obligations on outstanding financial obligations.

Holders of the company's retractable preferred shares have the ability to retract the shares to the company. The Class AA, Series I Preferred shares are retractable for cash, whereas the company has the right to issue debentures due 2019, 2014 and 2017 to settle retractions of the Class AA, Series III; Class AA, Series IV and Class AA, Series V preferred shares, respectively.

The company maintains financial assets and credit facilities to fund liquidity requirements in the normal course, in addition to its investment in Brookfield. The company's policy is to hold the Class A Shares and not engage in trading, however shares are available to be sold to fund retractions and redemptions of preferred shares or common shares. The company's ability to sell a substantial portion of the Class A Shares may be limited by resale restrictions under applicable securities laws that will affect when or to whom the Class A Shares may be sold. Accordingly, if and when the company is required to sell Class A Shares, the liquidity of such shares may be limited. This could affect the time it takes to sell the Class A Shares and the price obtained by the company for the Class A Shares sold.

No Ownership Interest

A direct investment in common shares does not constitute a direct investment in the Class A Shares of Brookfield or other securities held by the company. Holders of common shares do not own the Class A Shares or other securities held by the company or have any voting rights in respect of such securities.

Contractual Obligations

The company's contractual obligations are as follows:

International Financial Reporting Standards

The company adopted IFRS effective January 1, 2011 and has prepared the current interim financial statements using IFRS accounting policies. Prior to the adoption of IFRS, the company's financial statements were prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP"). The company's financial statements for the year ending December 31, 2011 will be the first annual financial statements that comply with IFRS.

Significant differences between IFRS and Canadian GAAP

IFRS are premised on a conceptual framework similar to Canadian GAAP, however, significant differences exist in certain matters of recognition, measurement and disclosure.

The following discussion highlights the significant new standards that the company has adopted under IFRS and the effect on the comparative period results of operations and financial position as previously reported under Canadian GAAP as well as the possible effects going forward.

(i) Foreign exchange gains and losses on available-for-sale debt securities

Under Canadian GAAP, foreign exchange gains and losses on available-for-sale debt securities are recorded in other comprehensive income whereas under IFRS these gains or losses are recorded directly to profit or loss. This difference will not impact comprehensive income or total shareholder's equity reported by the company because any impact to net income will be equally offset by a change in other comprehensive income.

(ii) Deferred taxes

Deferred taxes related to the adjustment as described above.

IFRS 1 First-time Adoption of International Financial Reporting Standards

The adoption of IFRS requires the application of IFRS 1 First-time Adoption of International Financial Reporting Standards ("IFRS 1"), which provides guidance for an entity's initial adoption of IFRS. IFRS 1 generally requires that an entity applies all standards effective at the end of its first IFRS reporting period retrospectively. However, IFRS 1 does require certain mandatory exceptions and provides limited optional exemptions in specified areas of certain standards from this general requirement. The company did not elect any of the available optional exemptions on adoption of IFRS.

Review of Interim Financial Statements

The accompanying unaudited interim financial statements of the company have been prepared by and are the responsibility of the company's management. The company's independent auditor has not reviewed these financial statements.

Forward-Looking Information

This interim report contains forward-looking information concerning the company's business and operations. The words "objective", "expect", "potential", "believes" and other expressions of similar import, or the negative variations thereof, and similar expressions of future or conditional verbs such as "may", "should", "could", "would" or "will", are predictions of or indicate future events, trends or prospects or identify forward-looking information. Forward-looking information in this interim report includes, among others, statements with respect to the company's objective of providing capital appreciation to its common shareholders, its use of operating cash flows and investment income, potential tax liability, expected future results, expected operating cash requirements, expected distributions on the Brookfield securities held by the company, the impact of the adoption of IFRS on the company's reported financial position and results of operations, the company's liquidity and its ability to finance its obligations, and other statements with respect to the company's beliefs, outlooks, plans, expectations and intentions.

Although the company believes that the anticipated future results or achievements expressed or implied by the forward-looking information and statements are based upon reasonable assumptions and expectations, the reader should not place undue reliance on the forward-looking statements and information because they involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the company to differ materially from anticipated future results, performance or achievement expressed or implied by such forward-looking information and statements.

Factors that could cause actual results to differ materially from those contemplated or implied by the forward-looking information include: the behavior of financial markets, including fluctuations in interest and exchange rates, availability of equity and debt financing and other risks and factors detailed from time to time in the company's other documents filed with the Canadian securities regulators.

We caution that the foregoing list of important factors that may affect future results is not exhaustive. When relying on our forward-looking information to make decisions with respect to the company, investors and others should carefully consider the foregoing factors and other uncertainties and potential events. Except as may be required by law, the company undertakes no obligation to publicly update or revise any forward-looking information or statements, whether written or oral, that may be as a result of new information, future events or otherwise. Reference should be made to the company's most recent Annual Information Form for a description of the major risk factors.

Cautionary Statement Regarding Use of Non-IFRS Accounting Measures

This interim report makes reference to net income for common shareholders and net book value per common share, and provides a full reconciliation between these measures and net income and total assets, respectively, which the company considers to be the most directly comparable measures calculated in accordance with IFRS.

1. Business Operations

BAM Investments Corp. (the "company") is an investment holding company incorporated under the laws of Ontario which owns a leveraged investment in Brookfield Asset Management Inc. ("Brookfield"). Brookfield provides management and administration services to the company. The consolidated financial statements include the accounts of the company's wholly-owned subsidiary, BAM Split Corp. ("BAM Split").

2. Summary of Significant Accounting Policies

These consolidated financial statements of the company have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting ("IAS 34") as issued by the International Accounting Standards Board ("IASB") and using the accounting policies the company expects to adopt in its consolidated financial statements as at and for the year ending December 31, 2011.

As these interim financial statements are prepared using International Financial Reporting Standards ("IFRS"), certain disclosures that are required to be included in annual financial statements prepared in accordance with IFRS that were not included in the company's most recent annual financial statements prepared in accordance with Canadian Generally Accepted Accounting Principles ("Canadian GAAP") were included in the company's financial statements for the three months ended March 31, 2011.

These interim financial statements should be read in conjunction with the company's 2010 annual financial statements and in consideration of the IFRS transition disclosures included in Note 3 to these financial statements and the additional annual disclosures provided in the company's financial statements for the three months ended March 31, 2011.

These financial statements were authorized for issuance by the Board of Directors of the company on August 24, 2011.

3. Transition To IFRS

The company prepared its financial statements in accordance with Canadian GAAP for all periods up to and including December 31, 2010. The company's financial statements for the year ended December 31, 2011 will be the first annual statements that comply with IFRS. Accordingly, the company will make an unreserved statement of compliance with IFRS beginning with its 2011 annual financial statements.

The company adopted IFRS effective January 1, 2011. The company's transition date is January 1, 2010 and the company prepared its opening IFRS balance sheet at that date. These financial statements have been prepared in accordance with the accounting policies described in Note 2. This note explains the impact of the company's transition to IFRS.

(a) Elected exemptions from full retrospective application

These consolidated financial statements have been prepared in accordance with IFRS 1 First-time Adoption of International Financial Reporting Standards ("IFRS 1"). While IFRS 1 permits certain optional exemptions from full retrospective application of IFRS, the company has not used any of these exemptions.

(b) Mandatory exceptions to retrospective application

In preparing these consolidated financial statements in accordance with IFRS 1 the company has applied the mandatory exception to full retrospective application of IFRS regarding estimates. Specifically, hindsight was not used to create or revise estimates and accordingly the estimates previously made by the company under Canadian GAAP are consistent with their application under IFRS.

(c) Significant differences between IFRS and Canadian GAAP

IFRS are premised on a conceptual framework similar to Canadian GAAP, however, significant differences exist in certain matters of recognition, measurement and disclosure. The adoption of IFRS has no impact on the cash flows generated by the company, however, the adoption of IFRS resulted in the following changes to the reported financial position and results of operations of the company:

(i) *Foreign exchange gains and losses on available-for-sale debt securities*

Under Canadian GAAP, foreign exchange gains and losses on available-for-sale debt securities are recorded in other comprehensive income whereas under IFRS these gains or losses are recorded directly to profit or loss.

This difference will not impact comprehensive income or total shareholder's equity reported by the company because any impact to net income will be equally offset by a change in other comprehensive income.

(ii) *Deferred taxes*

Deferred taxes related to the adjustment as described above.

(d) Reconciliation of equity as reported under Canadian GAAP to IFRS

The following is a reconciliation of the company's equity reported in accordance with Canadian GAAP to its equity in accordance with IFRS as at January 1, 2010:
