The Company recorded net income of \$18 million (\$0.25 per common share) for the three months ended June 30, 2014 compared to \$5 million (\$0.07 per common share) in the prior year period. During the second quarter, the Company's net book value increased by \$1.72 per share to \$29.81 per share due to increases in the market value of the Company's investment portfolio of which \$18 million was recorded in net income and the balance of \$109 million in other comprehensive income.

This consisted of \$1 million (2013 – \$1 million) of distributions received and \$6 million (2013 – \$3 million) in valuation gains associated with the fund's investment portfolio.

Income Taxes

The Company recorded an income tax expense of \$1.5 million (2013 – \$0.6 million) during the three months ended June 30, 2014. Shareholders' Equity

The increase is primarily the result of a higher market value of the Class A Shares of Brookfield, whose share price increased from \$41.10 at December 31, 2013 to \$47.01 at June 30, 2014.

BUSINESS ENVIRONMENT AND RISKS

The Company's activities expose it to a variety of financial risks, including market risk (i.e. currency risk, interest rate risk, and other price risk), credit risk and liquidity risk. The following are risk factors relating to an investment in the common shares of the Company.

Fluctuations in Value of Investments

The value of common shares may vary according to the value of the Class A Shares and other securities owned by the Company. The value of these investments may be influenced by factors not within the control of the Company, including the financial performance of Brookfield and other investees, interest rates and other financial market conditions. As a result, the net asset value of the Company may vary from time to time.

The future value of the common shares will be largely dependent on the value of the Class A Shares. A material adverse change in the business, financial conditions or results of operations of Brookfield and other investees of the Company will have a material adverse effect on the common shares of the Company. In addition, the Company may incur additional financial leverage in order to acquire, directly or indirectly, additional securities issued by Brookfield, which would increase both the financial leverage of the Company and the dependency of the future value of the common shares on the value of the Class A Shares.

Foreign Currency Exposure

The Company's investment in Brookfield and certain of its other investments are functionally United States dollar investments. Accordingly, the value of these assets may vary from time to time with fluctuations in the exchange rate between Canadian and United States dollars. In addition, these investments pay distributions and interest in United States dollars. Strengthening of the Canadian dollar relative to the United States dollar could decrease the amount of cash available to the Company.

Leverage

The Company's assets are financed in part with the retractable preferred shares issued by Partners Value Split and Global Champions. This results in financial leverage that will increase the sensitivity of the value of the common shares to changes in the values of the assets owned by the Company. A decrease in the value of the Company's investments may have a material adverse effect on the Company's business and financial conditions.

Liquidity

The Company's liquidity requirements are typically limited to funding interest and dividend obligations on outstanding financial obligations.

Holders of the Company's retractable preferred shares issued by either Partners Value Split or Global Champions have the ability to retract their shares. The Class AA, Series I Preferred shares are retractable for cash, whereas the Company has the right to issue debentures, as opposed to cash, to settle retractions of the Class AA, Series III; Class AA, Series IV; Class AA, Series V; and Class A Series I preferred shares, respectively.

The Company maintains financial assets and credit facilities to fund liquidity requirements in the normal course, in addition to its investment in Brookfield. The Company's policy is to hold the Class A Shares and not engage in trading, however shares are available to be sold to fund retractions and redemptions of preferred shares or common shares. The Company's ability to sell a substantial portion of the Class A Shares may be limited by resale restrictions under applicable securities laws that will affect when or to whom the Class A Shares may be sold. Accordingly, if and when the Company is required to sell Class A Shares, the liquidity of such shares may be limited. This could affect the time it takes to sell the Class A Shares and the price obtained by the Company for the Class A Shares sold.

No Ownership Interest

A direct investment in common shares does not constitute a direct investment in the Class A Shares of Brookfield or other securities held by the Company. Holders of common shares do not own the Class A Shares or other securities held by the Company or have any voting rights in respect of such securities.

Contractual Obligations

The Company's contractual obligations as of June 30, 2014 are as follows:

(Thousands)	Total	Payment Due By Period

Net income	18,219	14,711	15,480	3,151	5,156	8,767	5,089	4,828
Net income per common share	0.25	0.20	0.21	0.04	0.07	0.12	0.07	0.07

Net income includes dividends and interest on the Company's investment portfolio, in addition to valuation gains relating to the Global Champions portfolio and the investment in New Horizons, and fluctuates accordingly with changes in the U.S. dollar relative to the Canadian dollar on dividends earned on U.S. dollar and other foreign currencies investments in addition to changes in equity markets. Also included in net income are gains and losses on the disposition of investments. The variance in net income on the last eight quarters is primarily the result of valuation gains on certain of the Company's investments and increases in the dividend income earned from its investments.

RELATED-PARTY TRANSACTIONS

Brookfield provided management and financial services to the Company during 2014 and 2013 and recovered costs of \$20,000 for the period ended June 30, 2014 (June 30, 2013 – \$20,000) plus applicable sales tax in respect of those services.

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates are required in the determination of future cash flows and probabilities in assessing net recoverable amounts and net realizable values; tax and other provisions; and fair values for disclosure purposes. In the normal course of operations, the Company may execute agreements that provide for indemnification and guarantees to third parties in transactions such as business dispositions, business acquisitions and the sale of assets. The nature of substantially all of the indemnification undertakings precludes the possibility of making a reasonable estimate of the maximum potential amount that the Company could be required to pay to third parties as the agreements often do not specify a maximum amount and the amounts are dependent upon the outcome of future contingent events, the nature and likelihood of which cannot be determined at this time. Historically, the Company has not made any payments under such indemnification agreements and guarantees.

DISCLOSURE CONTROLS AND PROCEDURES

We maintain appropriate information systems, procedures and controls to ensure that new information disclosed externally is complete, reliable and timely. The President and the Vice President, Finance of the Company evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in "National Instrument 52-109, Certification of Disclosure in Issuers' Annual and Interim Filings") as at June 30, 2014, and have concluded that the disclosure controls and procedures are operating effectively.

INTERNAL CONTROLS OVER FINANCIAL REPORTING

We maintain appropriate internal controls over financial reporting (as defined in “National Instrument 52-109, Certification of Disclosure in Issuers’ Annual and Interim Filings”) and the Chief Executive Officer and the Chief Financial Officer have concluded that the internal controls have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. Management has evaluated whether there were changes in our internal controls over financial reporting during the period ended June 30, 2014 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting and has determined that there have been no such changes.

REVIEW OF INTERIM FINANCIAL STATEMENTS

Notes To The Consolidated Financial Statements

1. BUSINESS OPERATIONS

Partners Value Fund Inc. (the “Company”) is an investment holding company incorporated under the laws of the province of Ontario which owns a leveraged investment in Brookfield Asset Management Inc. (“Brookfield”). Brookfield provides management and administration services to the Company. The consolidated financial statements include the accounts of the Company’s wholly-owned subsidiaries, Partners Value Split Corp. (“Partners Value Split”) and Global Champions Split Corp. (“Global Champions”). The Company was formed by articles of incorporation under the Business Corporations Act (Ontario) and is registered in Ontario, Canada. The registered office of the Company is Brookfield Place, 181 Bay Street, Suite 300, Toronto, Ontario, M5J 2T3.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Statement of Compliance

The condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standards (“IAS”) 34, Interim Financial Reporting on a basis consistent with the accounting policies disclosed in the audited consolidated financial statements for the fiscal year ended December 31, 2013.

The interim financial statements should be read in conjunction with the most recently issued Annual Report of the Company which includes information necessary or useful to understanding the Company’s businesses and financial statement presentation. In particular, the Company’s significant accounting policies were presented as Note 2 to the Consolidated Financial Statements for the fiscal year ended December 31, 2013 included in that report, and have been consistently applied in the preparation of these interim financial statements.

The interim financial statements are unaudited. The results reported in these interim consolidated financial statements should not be regarded as necessarily indicative of results that may be expected for the entire year.

These financial statements were authorized for issuance by the Board of Directors of the Company on August 21, 2014.

(b) Adoption of Accounting Standards:

IAS 32, *Financial Instruments: Presentation* (“IAS 32”) was amended to clarify certain aspects as a result of the application of offsetting requirements, namely focusing on the following four main areas: the interpretation of “currently has a legally enforceable right of set-off”, the application of simultaneous realization and settlement, the offsetting of collateral amounts, and the unit of account for applying the offsetting requirements. IAS 32 is effective for annual periods beginning on or after January 1, 2014. There was no impact as a result of the adoption of IAS 32 on the Company’s consolidated statements.

The IASB issued amendments to IFRS 10, *Consolidated Financial Statements* (“IFRS 10”) to provide an exception to the consolidation requirements in IFRS 10. Under IFRS 10, reporting entities were required to consolidate all investees that they control (i.e. all subsidiaries). The amendments required investment entities to measure particular subsidiaries at fair value through profit or loss, rather than consolidate them, if they met certain conditions. The amendments also set out disclosure requirements for investment entities. The amendments to IFRS 10 were effective for annual periods beginning on or after January 1, 2014. There was no impact as a result of the adoption of IFRS 10 on the Company’s consolidated statements and the Company will continue to consolidate its subsidiaries.

(c) Future Changes in Accounting Standards

Financial Instruments

IFRS 9, *Financial Instruments* (“IFRS 9”) was issued by the IASB on November 12, 2009 and will replace IAS 39, *Financial Instruments: Recognition and Measurement* (“IAS 39”). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. The company has not yet determined the impact of IFRS 9 on its consolidated financial statements.

4. FAIR VALUES OF FINANCIAL INSTRUMENTS

The fair value of a financial instrument is the amount of consideration that would be agreed upon in an arm's-length transaction between knowledgeable, willing parties who are under no compulsion to act. Fair values are determined by reference to a price within a bid-ask spread that is deemed most appropriate.

Fair value hierarchical levels are directly determined by the amount of subjectivity associated with the valuation of these assets and liabilities and are as follows:

Level 1 – Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date.

Level 2 – Inputs (other than quoted prices included in Level 1) are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.

Level 3 – Inputs reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date. Consideration is given to the risk inherent in the valuation technique and the risk inherent in the inputs used in determining the estimate.

The fair value hierarchical level associated with the Company's financial assets and liabilities measured at fair value consists of the following:

<i>(Thousands)</i>	June 30, 2014			December 31, 2013		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Brookfield Asset Management Inc.	\$2,643,195	\$ —	\$ —	\$2,310,897	\$ —	\$ —

¹ Excludes New Horizons which is not held at fair value and is accounted for using the equity method.
